

The Avoca VIP Music Edition™ – System Highlights

Your Music, Your Choice – Just Ask!

The VIP Music Edition is a music control system for the living room, with a magical difference – it turns your CD collection into a digital library with our unique Say it-Play it™ control interface. Touch the Avoca Music Companion™, or talk to it – this system is the fastest, most entertaining way to find & play your music.

System Components and Features

The VIP Music Edition system includes an **Avoca VIP Music Companion (MC™)**, the wireless handheld device with our touch & talk user interface and the **Avoca VIP Music Player**, which plays your CDs, stores a copy in lossless digital format, and simply plugs into your stereo via RCA or optical cable connections.

Users get flexible control of their music collection, including:

- **The Music Companion wireless controller – more mobile, more convenient, more fun** – The large screen Avoca MC™ controller provides a portable browsing list of your music library, by genre, artist, album, or track. By touch or by voice, using Say it-Play it, you get the most out of your music investment – from anywhere around your home – without a direct line of sight to your Avoca music player, and without depending on the TV to see your music list. The MC gives users the freedom to roam and relax. Let the music play!
- **The VIP Music Player – play your CDs, put them away – no more CD Hassles!** – Just play your CD music in the Avoca VIP Music Player. A copy is loaded into the disk storage, building your digital library. No more frustration finding that CD – then enjoy your CDs in the car, at the cottage or while traveling!
- **Say it-Play it User Interface for music** – Know what music you want? Just ask! Say simple, intuitive voice commands like: ‘Play The Eagles’; ‘Play The Boss’; ‘Set volume to 8’; ‘Display by Artist’; ‘Cue Yesterday’; to browse and enjoy your music collection. Voice control is fast, convenient and fun, by-passing menu trees – avoiding the delays of traditional interfaces. Attach a personal nickname or shorter name to a music item – making it more convenient to select, or just to personalize your system.
- **Avoca’s Media Control Platform™** – The foundation of the VIP Music Edition, Avoca MCPT™ provides fast voice-enabled media search and control abilities, based on speaker-independent recognition technology, proven in millions of devices. The powerful content management functions are designed in close cooperation with All Media Guide (AMG), an Avoca solution collaborator and the leading authority on music metadata.

A unique gift for a special person? – Great idea for a loved one, or for yourself! Imagine the fun you can have with your music collection. Multiple users, friends, and family can all enjoy the Avoca VIP Music Edition. By touch or by simple English commands, no system training is required – Avoca users say the VIP system is now one of their favorite entertainment products! ... Just call us for a demonstration.
